FEROZEPUR ROAD, LUDHIANA

The Centre of Excellence in Kidney Care with Comprehensive Urology, Nephrology, and Dialysis Treatment Available at RG Ludhiana was featured in The Times of India- Ludhiana & Hindustan Times- Ludhiana, Jalandhar, Amritsar, Malwa and Patiala.

CLINICAL EXCELLENCE

**Bariatric Surgery (Laparoscopic Sleeve Gastrectomy) + Large Incisional Hernia (4 x 5 cm) Repair & Laparoscopic Cholecystectomy performed on a Morbidly Obese Patient, BMI Measuring-53 (kg/m<sup>2</sup>)- Resulting in 20 kgs Weight Loss in 2 months (Post Surgery) - RG Hospitals, Ludhiana.**

**Faculty:**

1. Dr. Rohtash Luthra - (Consultant General, Laparoscopic and Bariatric Surgery)
2. Dr. Yugam - (Sr. Consultant- Anesthesia)

**Presenting/Chief Complaints:**

A 41-year-old female presented with pain in the lower abdomen. She had a history of 2 pelvic surgeries with Pfannenstiel incision. On examination, she had an incisional hernia of size approximately 4 x 5 cm. She was Morbidly Obese with a BMI of 53 (kg/m<sup>2</sup>) (Weight 120 kgs, Height 5'1) and was recently diagnosed with diabetes. She also had symptoms of Obstructive Sleep Apnoea. The patient was counselled for Bariatric Surgery and also about the recurrence of hernia with this BMI. NCCT abdomen was done to exactly see the hernia and incidental gallstones were also detected.

**Diagnosis:**

Morbid Obesity BMI- 53 (kg/m<sup>2</sup>) with a Large Incisional Hernia (4x5cm) and Multiple Gallbladder Stones.

**Treatment/Procedure/Surgery:**

Laparoscopic sleeve gastrectomy with Incisional Hernia Repair + Laparoscopic Cholecystectomy was done.

**Operative Findings:**

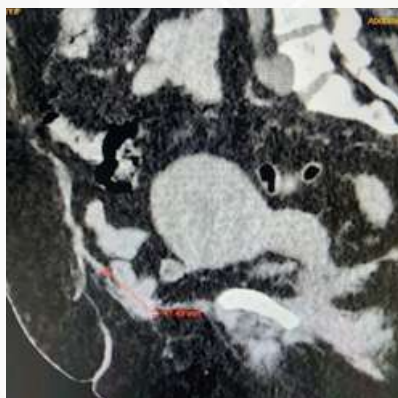

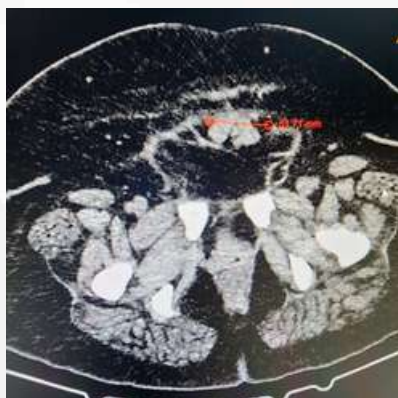

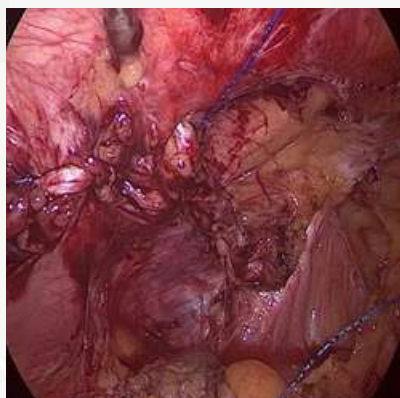

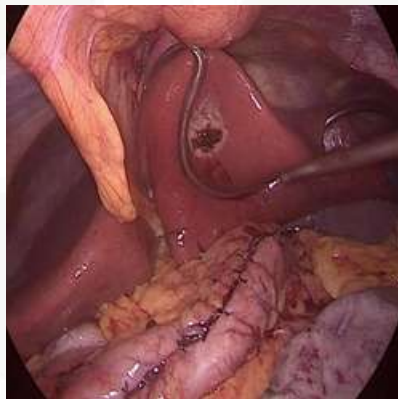

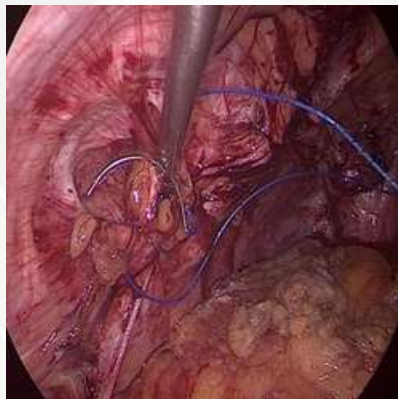

Laparoscopic Sleeve Gastrectomy was not the procedure of choice with this BMI but because of the large incisional hernia\_ and dense small bowel and omental adhesions in the pelvis bypass procedure was not done and it was informed to the patient preoperatively.

**Course of Hospitalisation and Condition of Patient at the Time of Discharge:**

Patient is very compliant and is doing really well. She has lost 20 kgs in 2 months post-surgery.

**FEROZEPUR ROAD, LUDHIANA**

**CLINICAL EXCELLENCE**

## Laparoscopic Choledochoduodenostomy- RG Hospitals, Ludhiana

### Faculty:

1. Dr. Rohtash Luthra - (Consultant General, Laparoscopic and Bariatric Surgery)
2. Dr. Yugam - (Sr. Consultant- Anaesthesia)

### Presenting/Chief Complaints:

A 65-year-old female underwent open cholecystectomy 15 years back, now presented with obstructive jaundice and was diagnosed with 3 large stones present in the common bile duct for which ERCP was attempted twice (outside) and was failed. Two stents were placed in the bile duct. Patient then came to RG Ludhiana for further management.

### Diagnosis:

Primary CBD Stones (Considering H/O Cholecystectomy 15 years back)

### Treatment/Procedure/Surgery:

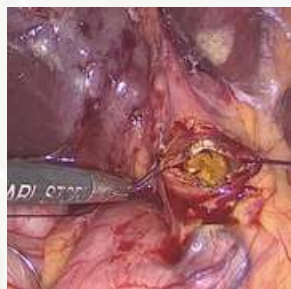

Laparoscopic CBD Exploration + Laparoscopic Choledochoduodenostomy

### Operative Findings:

Laparoscopic CBD exploration was done. After removing all the stones and confirming CBD clearance with a Cholangioscope, Laparoscopic Choledochoduodenostomy was done.

### Course of Hospitalisation and Condition of Patient at the Time of Discharge:

Patient was discharged on day 2 and the postoperative period was uneventful. CBD stents were removed after 2 weeks and CBD clearance was again confirmed with cholangiogram.

**FEROZEPUR ROAD, LUDHIANA**

**RG Ludhiana organised a CME Program.**

**The keynote speakers and their topics were: -**

**Dr. Rohtash Luthra** (Consultant - Advanced Laparoscopic & Bariatric Surgery) and **Dr. Harsimran Singh** (Associate Consultant - General & Laparoscopic Surgery) - **Advanced Laparoscopy in Today's Surgical Practice.**

"Health Talk" is a unique initiative by The Hindustan Times aimed at helping its readers lead healthier and happier lives. In these health talks, experts from various specialties provide daily articles that offer insights on preventive interventions to promote good health.

We are pleased to announce that, as part of this initiative, an article featuring **Dr. Punit Bansal** (Director & Head - Institute of Urology) from RG Ludhiana, on the topic **"Transforming Prostate Treatment: Minimally Invasive Options for Better Patient Outcomes,"** has been published in The Hindustan Times - Ludhiana, Amritsar, Patiala, Jalandhar, and Malwa on 30th September 2024.

HINDUSTAN TIMES MEDIA MARKETING INITIATIVE

### Transforming Prostate Treatment: Minimally Invasive Options for Better Patient Outcomes

Prostate enlargement is a common condition affecting elderly males, often due to benign prostatic hyperplasia, prostateitis, or prostate cancer. In the last 20 years, advancements in prostate surgery have led to a shift from traditional open procedures to more sophisticated, minimally invasive techniques. Innovative approaches like UroLift, Rezum, and HoLEP (Minimally Invasive Prostate Surgery) have greatly improved patient outcomes by reducing recovery time and minimizing complications. The introduction of smaller instruments, such as the ZIF endoscope, compared to the traditional 26F scopes, has significantly lowered the risk of urethral complications, particularly strictures. A groundbreaking technology in prostate gland removal is the 152W Holmium laser machine, introduced by RG

smooth for patients. The 152W Holmium laser machine allows for nearly scarless surgeries, enabling patients to be discharged within a day. Even patients on blood thinners can safely undergo these procedures due to the minimal blood loss and fast recovery time.

Nowadays, even patients who are unfit for traditional surgery can benefit from advanced options like UroLift and Rezum, which can be performed under local anesthesia. Although these procedures are currently more expensive, limiting their widespread use, they offer a highly effective solution for those unable to undergo conventional surgeries.

One of the major benefits of minimally invasive prostate surgery is the preservation of normal bodily functions. With traditional open surgery, there is a higher risk of affecting urinary and sexual functions.

However, minimally invasive techniques, such as laser surgery and UroLift, are designed to reduce these risks. They target only the affected tissues without damaging the surrounding nerves or muscles, preserving quality of life. These more extensive minimally invasive options are highly beneficial for patients who are concerned about long-term side effects, including incontinence or erectile dysfunction.

**DR. PUNIT BANSAL**  
Director & Head -  
Institute of Urology  
RG STONE HOSPITALS,  
LUDHIANA

Stone is the first of its kind in North India. In this procedure a smaller 22 Fr scope is used with a single incision. This is best suited for the urethra of Indian men. This advancement not only enhances surgical precision but also minimizes trauma to the urethra, resulting in lower post-operative complications. The use of smaller instruments helps preserve the urethral structure, making recovery faster and

PRESENTS  
**HEALTH TALK**  
SEP. 28 - SEP. 30

**A CME programme on the topic Mastering the Metabolic Maze in Diabetes was specially curated for resident doctors at both the units of RG Hospitals, Ludhiana (Model Town and Ferozepur Road) along with DNB students from Oswal Hospital.**

The keynote speakers were:

**Dr. Prerna Goyal:** MD Medicine and Diabetologist- RG Hospitals, Ludhiana

**Dr. Geeti Puri Arora:** MD Medicine and Diabetologist- Oswal Hospital, Ludhiana

**Dr. Savita Jain:** DM Endocrinology- Ludhiana

The focus of the CME was on the upcoming anti-diabetic agents that have cardiorenal benefits and the speakers also discussed recent developments in weight management with GLP 1 analogues.

Resident doctors actively raised queries about the basics of inpatient diabetes management. This academic exchange between resident doctors from both hospitals strengthened their professional and peer relationships, contributing to a valuable collaborative learning experience.
