'Robotic-assisted hernia repair sets new standard in minimally invasive surgery'

Robotic-assisted surgery is one of the most revolutionary innovations in the field of surgery. "Particularly in hernia repair, this technology is not only transforming the way surgeons approach these common conditions but is also setting a new standard for minimally invasive procedures," says Dr Manish D Sharma.

He explains, "In a robotic-assisted hernia repair surgery, the surgeon controls robotic arms with advanced precision tools, all from a console. These robots feature high-definition 3D cameras, magnified views, and specialized instruments that give surgeons better control over the delicate tissues involved in hernia repair."

According to Dr Manish, "Robotic surgery allows for unprecedented precision, reducing the risk of injury to surrounding tissues. This precision is especially critical in hernia repair, where delicate abdominal organs and structures must be carefully navigated."

He adds, "Traditionally, this surgery has been done using either open surgery, which involves a larger incision, or laparoscopic surgery, which uses smaller incisions and a camera. While both methods are effective, they come with limitations."

The doctor says that open surgery requires a large incision and results in a longer recovery time, while laparoscopic surgery, though minimally invasive, but can be perfected with robotic

Dr Manish D Sharma, HOD General Surgery, Minimal Access Surgery, Robotic & Bariatric Surgery, RG Stone Hospital, Pitampura

surgery that comes in, offering unparalleled precision, flexibility, and control and added advantage of high-level 3D optics.

He says, "Robotic-assisted surgery is minimally invasive as surgeon makes several small incisions rather than a large one, leading to less trauma, reduced blood loss, and fewer complications. Smaller incisions also mean smaller scars and less postoperative pain, leading to quicker recovery times for patients. Thus, patients undergoing robotic hernia repair tend to experience quicker recovery times."

"Robotic surgery is undeniably revolutionizing hernia repair. It brings together precision, efficiency, and safety in ways that traditional methods cannot match. As the technology continues to improve, we can look forward to even better outcomes for patients undergoing hernia surgery, with faster recoveries, less pain, and fewer complications," adds the doctor.

CLINICAL EXCELLENCE

FIRST UROLIFT–LUDHIANA

Dr. Punit Bansal

(Director & Head – Institute of Urology)

A male patient presented with complaints of poor urinary flow, straining to void, dribbling of urine, and burning sensation in the urinary bladder.

He had a history of regular Clean Intermittent Catheterization (CIC) for the past 2–3 months.

Past Medical & Surgical History:

- TURP – 1999
- BNI – 2008
- Coronary Artery Disease (CAD)
- Post PTCA in 2023

Diagnosis:

BPH (Benign Prostatic Hyperplasia)

Treatment Performed:

Cystoscopy and Urolift under GA

Key Highlights of the Case:

- Urolift offers relief from symptoms of BPH without tissue removal
- Minimally invasive day-care procedure with faster recovery
- Avoids the need for long-term catheterization and medications
- Preserves sexual function
- Ideal for patients unfit for major surgery

Setting yet another milestone in advanced urology, RG Ludhiana continues to lead with innovation, from Pioneering North India's first 152W Holmium Laser to successfully performing Urolift Procedures. We are proud to offer world-class, minimally invasive solutions that ensure better outcomes for our patients.

CLINICAL EXCELLENCE

RARE CASE OF UTERUS DIDELPHYS WITH MULTIPLE LARGE FIBROIDS MANAGED LAPAROSCOPICALLY RG PITAMPURA

Dr. Richa Arora Miglani

(Senior Consultant – Gynaecology, Laparoscopic & Robotic Surgery)

A 40-year-old female patient presented with complaints of lower abdominal pain and abnormal vaginal bleeding with history of previous 2 cesarian sections.

Diagnosis:

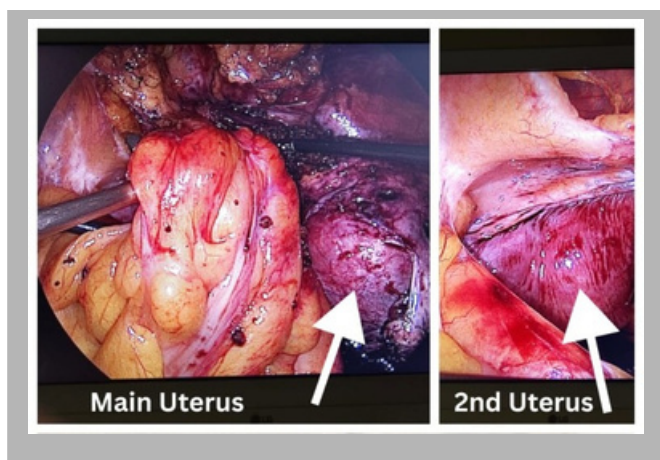

Uterus Didelphys (Double Uterus) with Multiple Large Fibroids in Both Uteri

Treatment Performed:

- Total Laparoscopic Hysterectomy (TLH) of Both Uteri
- Right Salpingectomy
- Bladder & Bowel Adhesiolysis
- Cystoscopy with Bilateral Ureteric Catheterization

Key Highlights of the Case:

- Complex Total Laparoscopic Hysterectomy (TLH) successfully completed in 5 hours
- Extremely rare anatomical challenge of two separate uteri with multiple large fibroids
- Bladder densely adherent; meticulous adhesiolysis performed to safeguard bladder integrity
- Rectosigmoid adherent to bladder & uterus. Bowel adhesiolysis done
- Preservation of ureteric safety with pre-operative bilateral ureteric catheterization

Setting yet another milestone in Advanced Laparoscopic Gynaecology, RG Pitampura continues to lead with surgical innovation and precision, offering world-class, Minimally Invasive Solutions for even the most complex anatomical anomalies.

CLINICAL EXCELLENCE

RG HOSPITALS, PITAMPURA

We are pleased to share a Significant Milestone in our Journey towards Surgical & Clinical Excellence — RG Hospitals has Successfully Completed Over 500 Robotic Surgeries. This accomplishment highlights the teamwork and dedication of our surgical and clinical experts.

Adding to this landmark accomplishment, **Dr. Manish D Sharma (HOD – Minimal Access, General, Robotic & Bariatric Surgery)** has set another record by performing 300 Surgeries in a Single Month, what makes this feat even more extraordinary is that Dr. Sharma has also Independently Completed 300 Robotic Surgeries, marking a new benchmark in Minimally Invasive and NexGen Surgery.

Congratulations to Dr Manish D Sharma and The Entire Team@ RG Pitampura for this remarkable achievement

Also wish to place on record our appreciation for Dr Pankaj Gupta – Sr Consultant- Minimal Access, General, Robotic & Bariatric Surgery for performing 150+ Robotic Surgeries successfully. We also thank CMR Surgical Team for their support throughout.

Here's to many more milestones as we continue to redefine excellence in healthcare

#ClinicalExcellence #RoboticSurgery #MinimallyInvasiveSurgery #NexGenSurgery

CLINICAL EXCELLENCE

RGHOSPITALSGOA—MILESTONEINONCOLOGYSERVICES

We are proud to share a significant achievement in our journey of Advanced Cancer Care at RG Goa—The Successful Completion of 3 HIPEC procedures, a supra-major surgical intervention, along with 100+ Chemotherapy Sessions. This marks a major step forward in offering comprehensive and cutting-edge oncology services to our patients.

We appreciate the Dedicated Efforts of

Dr. Sachin Ambre (Consultant – Surgical Oncology),

Dr. Hemant Parsekar (Consultant – Anaesthesia),

Dr. Anjum Mahabari (SBU Head), and the Entire RG Goa team — for making this milestone possible.

Together, we remain committed to delivering hope and healing through excellence in cancer care.
