## SUBCORONAL URETHROCUTANEOS FISTULA REPAIR

A 22 year old male presented to RG EOK to with complaints of passing urine from the under surface of the penis. After further evaluation the patient was diagnosed with Post Hypospadias Fistula.

Our team of doctors in which Dr. Manish Singla and Dr. Sandeep Yadu planned for Subcoronal Urethrocutaneous Fistula Repair under GA+ SA.

Intraoperatively a circumferential coronal incision was given and penile skin was degloved to the root of penis. Skin was mobilised all around the fistula and glans wings were created. Subcutaneous suture applied and second layer of corpus spongiosum was reinforced. Tunica Viginal flap of left testis raised, rotated and fixed over corpus spongiosum as third layer. 12 Fr. Foleys catheter placed. Glans wings was closed and distal penile skin excised and sutured to glans wings and all around.

Post operatively the patient responded well to the treatment and was discharged in a stable and satisfactory condition.

**RG HOSPITAL GOA AND NORTH GOA POLICE OFFICIALS PERFORMED YOGA. MORE THAN 100 POLICE OFFICIALS PARTICIPATED IN THE EVENT.**
